

Orbiter

Wireless Pendant Microphone

Fact Sheet

The Teacher's Microphone

Introducing the Orbiter, a pendant microphone designed for all-day use. It features HD audio, comfortable ergonomics, and hassle-free classroom operation. The Orbiter, with powerful, 2.4-GHz RF electronics, is the world's first high-definition microphone for K-12. The Orbiter achieves the speech intelligibility required for enhanced student comprehension and word recognition. With its lightweight design and simple, 2-button control, teachers can simply focus on what they do best—teaching.

Product Features

- HD audio streaming for clear speech, enhanced word recognition, and improved learning
- Hands-free teaching with no line-of-site connection issues
- Long life battery for all-day use (8 hours)
- Lightweight and ergonomic design for all-day wearing comfort and operational simplicity
- Lifetime non-replaceable battery
- Quick, low-cost installation

Advanced 2.4-GHz Digital RF

Powered by state-of-the-art, internationally-certified 2.4-GHz RF with HD audio streaming technology, the Orbiter delivers stunningly clear and crisp speech. Point-to-point pairing prevents interference between rooms and proprietary technology provides high coexistence.

System Includes

- Pendant Transmitter
- Desktop Receiver
- Source Cable (50 ft.)
- Lanyard Kit

iPod® is a registered trademark of Apple Inc.

Ergonomics for All-Day Use

The Orbiter's lightweight design, easy-to-use lanyard, and ergonomic button controls make for comfortable, all-day use. And of course, the Orbiter looks good too.

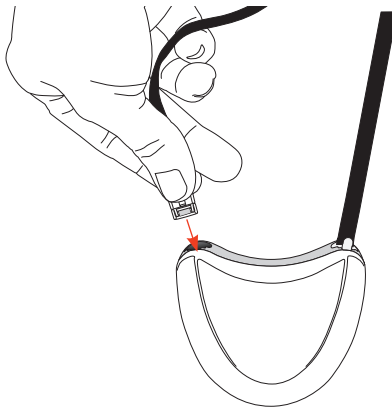

Intuitive 2-Button Control

Teaching is hard enough without using a microphone. Fortunately, the Orbiter's intuitive controls become second nature.

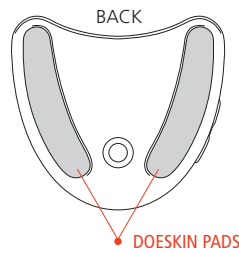

Quick Release Lanyard

The lanyard design includes release clips for fast and hassle-free removal.

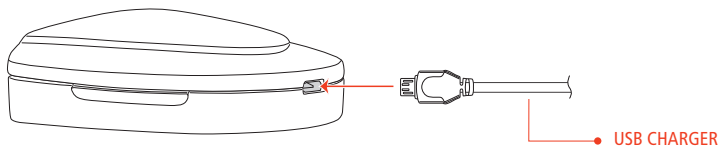

Doeskin Pads

2 mm thick doeskin pads are soft, adding comfort to the Orbiter's contact points.

Lifetime Non-Replaceable Battery

Never replace a battery—the Orbiter charges like a cell phone. 8 hours of voice time.

System Specifications

Orbiter Transmitter

RF

- State-of-the-art 2.4-GHz digital RF
- Proprietary coexistence technology
- Lifetime Li-Ion rechargeable battery

Audio

- HD uncompressed audio streaming
- Buffering and retransmission features
- 5 Mbps over-the-air data rate

Controls

Side: Volume Control (+ / -)

Back: Master Control (On / Off / Mute)
