

MimioStudio 9 Software

DESCRIPTION

MimioStudio™ 9 software brings a new level of simplicity to interactive teaching. It allows educators to build, deliver, and manage interactive lessons. You only need to learn a single software program to control all of your MimioClassroom™ products – and you'll get up to speed quickly because it's so intuitive.

Create with MimioStudio Notebook.

Personalize your lessons with comprehensive tools for producing text, drawing, and curriculum-focused classroom instruction. Each lesson can be saved in your multi-page MimioStudio Notebook workspace to be used over and over or shared with other teachers and students. A comprehensive toolset makes creating and delivering lessons more engaging and captivating, as students and teachers can write, draw, highlight, reveal, color, screen clip, or annotate lessons.

Build better activities, faster.

MimioStudio 9 software includes the ActivityWizard, an innovation that allows users to generate activities and automatically populate them with built-in intelligent content. The activity creator includes activities and templates identified by grade or age and subject matter, so teachers can be confident they are building age-appropriate activities into their lessons.

FEATURES

MimioStudio Notebook

Multi-page workspace to create and save classroom instruction.

MimioStudio Gradebook

Store testing results automatically from MimioVote™ assessment system, perform manual entry, or import/export via CSV and TXT files.

MimioStudio Gallery

Contains variety of ready-to-use backgrounds, pictures, multimedia files and lesson content, and other education visuals.

Nested folder structure enables easy search/find.

MimioStudio Tools

Comprehensive set of interactive tools and resources to create and present information.

Two views: a fully expanded view, for easy access to all features, and a compressed view, which takes up less space on the screen.

MimioStudio ActivityWizard

Automates activity creation process using step-by-step assistant to create Language Arts, Visual Arts, Math, Science, and Social Studies activities.

Multi-Language Version

MimioStudio is available in over 30 languages. For a complete list of supported languages please visit us at: mimio.dymo.com/products

Minimum System Requirements

Windows XP, Vista, and Windows 7

Mac OS 10.5, 10.6, and 10.7

Linux: Fedora and Ubuntu

MimioStudio 9 Software

FEATURES

Multimedia File Support	Import audio, video, and Flash files.
Hardware Integration	Compatible with all other Mimio hardware (except DMA-01).
Online Gallery	Access to country-specific lesson activities, curriculum standards, classroom resources, and curriculum-relevant content through mimioconnect.com.
Multimedia Drag-and-Drop	Easy retrieval/use of audio, video, and Flash files.
Lock Objects	Freeze objects in place on page for greater layout control.
Adjustable Transparency	Enables layering and emphasis of visual objects.
Resize	Objects can be resized to fit on the page, as needed.
Thumbnails	Displays multiple images in a single screen for easy access and navigation.
File Attachment	Allows you to embed additional content (e.g., DOC file) into an INK file.
Transitions & Animations	Add transitions and animations to objects for more dynamic, interactive presentations.
Writing Recognition	Converts handwriting into PC font-based text.
Audio, Video & Screen Recording	Record entire desktop or user-defined region of screen to create a video (with optional audio) for playback. Save files for playback. Integrated with MimioView™ document camera.
Marker Capture	Captures dry erase marker notes and drawings. Files can be saved in PDF, JPEG, and HTML.
Video Playback	Play/pause/rewind files embedded in video playback.
Spotlight & Reveal	Focuses attention on specific area of screen. Allows progressive presentation of content on screen. Spotlight can be resized. Reveals images in multiple directions.
Object Cloning	Duplicates static and animated images on screen. Faster and easier than cut-and-paste.
Embedded Audio	Adds sound to objects/images.
Shape Recognition	Quickly transforms freehand-drawn shapes into perfect shapes that can be filled, resized, and re-colored.
Brush and Pen Tools	Pen tool for drawing and writing. Brush pen for Asian calligraphy and stylized writing.
Keyboard Shortcuts	Single keyboard inputs to invoke popular commands.
