

For Fast and Intuitive Digital Workflows

Work Directly On Screen

The DTF-720 combines a 17", 5:4 LCD with Wacom's patented, cordless, battery-free pen technology. Use the pen directly on the display surface to enjoy the benefits of an all-digital workflow while simulating a pen-on-paper experience. The DTF-720 interactive pen display is an excellent choice for people who use applications that benefit from working with pen directly on screen, especially those who prefer a non-widescreen display. It can be utilized for redlining and signing documents, annotating and sharing presentations, completing forms, creating hand-drawn imagery, and capturing handwritten notes.

Key Features

- 17" display with SXGA (1280 x 1024) resolution.
- Built-in VGA pass-thru connector handles analog input and allows mirroring directly from pen display to a projector or another display.
- Internal USB hub with two user-accessible USB ports to provide easy access to your favorite USB devices.
- Completely flat surface for maximum comfort while working.
- Adjustable stand that allows for 17 to 73 degrees of incline.
- Pen that supports 512 levels of pressure-sensitivity on the pen tip. Also includes programmable side switches.
- Pop-up Menu feature (programmable via the Control Panel) puts additional commands at user's fingertips.
