

Xpresenter Xe™

THE STARTING POINT FOR DIGITAL SIGNAGE

Xpresenter Xe is a professional digital signage system designed for users who do not require the broad range of features of the full Xpresenter enterprise digital signage platform. Xpresenter Xe allows users to choose a configuration that works best for their specific application, saving money and eliminating unnecessary features and complexity. Completely scalable, Xpresenter Xe is ideal for both small and large digital signage networks, providing unprecedented ease-of-deployment and an easy growth path for future expansion.

Xpresenter Xe is built on the award-winning Xpresenter platform, which means users enjoy the same uncompromising output quality and web-based content management tools X20 Media is famous for, all at an affordable cost. Each configuration is available as a turnkey package, including all necessary player hardware and software, as well as access to the X20 Web Portal for managing content on any screen from anywhere in the world.

Xe >> Available Configurations
